

PULSATION DAMPENERS

Accessory that reduces pulsations caused by the Dosing Pump flow (Alternative volumetric).

- ✓Would you like to reduce the vibrations inherent to a Dosing Pump ?
- ✓Is it possible to increase the service life of you installation and minimize the maintenance costs?
- ✓Do you need to install any measuring instrument for the system to work properly?
- ✓Do you want to dose with maximum accuracy?

CALIBRATION POTS

Accessory to measure you dosing pump flow under real operating conditions using at minimum cost. .

- ✓Do you need to know the dosed real flow?
- ✓How do you know if your Dosing Pump is working well?
- ✓Would you like to know the real state of the Dosing Pump for maintenance?

RELIEF AND SECURITY VALVE

Accessory to protect the installation from overpressure.

- ✓Did you know that if any leakage due to overpressure without security valves, apart from the dangerous situations that may produce, you are breaking the law.?
- ✓Did you know that Health and Safety regulations oblige to install a Security Valve?
- ✓Did you know that a Security Valve is one of the main indicator of any incorrect operation in your installation in any circumstances ?

BACK-PRESSURE VALVES

Accessory to create artificial pressure (fixed but adjustable) from 1 to 3 bar at a Dosing Pump installation when there is not a minimum value of this back-pressure.

- ✓Did you know that you can correct the destructive effects of siphoning?
- ✓Did you know that without a minimum back-pressure the Dosing Pumps do not work correctly?
